To Whom It May Concern:

My husband and I are a little upset with this increase you are purposing, it calculates into a 186% and a 57% increase. We are retired and I am on disability, neither one of us get that kind of a cost of living wages. We could understand a 3.3% cost of living increase on the individual consumers, or a 7.00-dollar a month fee. More than that is robbery, the Gas Company needs to tighten their belt a little and budget like we have to do.
